

**CS24D**

**Not your ordinary color sensor.**

**Here's one reason.  
Superior color detection on textures and  
other challenging materials due to intense  
lighting from 24 ultra-bright LEDs and  
sensing areas as large as 0.47 x 0.54  
inches.**

**Color Sensors... and more.**

# CS24D Color Sensors

Discrete I/O and Teach Function

Delta's new CS24D Color Sensors—a big step in performance and value.

- ▶ Teach to recognize up to 15 colors.
- ▶ Four universal discrete outputs send binary-coded result to any PLC.
- ▶ Easily optimize using the Setup Wizard in Delta's *ColorSense* software.
- ▶ Several sensing area / standoff distance options fit sorting and color verification applications.
