

We call it math. You'll call it magic.

Tuning closed-loop motion was once a frustrating trial-and-error process. It's not an illusion—the **Tuning Wizard** makes the complex math invisible. Increased productivity is revealed, as if by magic.

Tuning Wizard

RMCWin software

Tuning closed-loop motion was once a frustrating trial-and-error process. Now optimizing complex industrial machinery takes just a few simple movements. First, slide a Delta Motion Controller into your machine. Then use Delta's Tuning Wizard software to optimize both electric and fluid power motion.

Precise closed-loop control boosts machine productivity and part quality.

It's not an illusion—the Tuning Wizard makes the complex math invisible. Motion errors vanish as well, freeing you to concentrate on your big picture. Best of all, your machine's increased productivity is revealed, as if by magic.

Get details at our website, or call now for a demo, and see it with your own eyes.
